An Interesting 2-Minute Read: Africa Region Brings the Gospel to Camelback

There are vast stretches of land in Africa where people make their living through camel herding. These nomadic people travel with their herds for grazing and water. They often cross borders with no regard for modern political states. While some romanticize this lifestyle as free and easy, nomadic people groups are classified as some of the most unreached people groups. USA/Canada Region - East Tennessee, USA

The work of the Church of the Nazarene began officially in the United States in 1887, though the formal organization of the denomination occurred in 1908 with the merger of several like-minded holiness groups. As in many parts of the world, there is an ever-increasing secularization of society, and in the post-COVID world, the United States finds itself fragmenting politically, socially, and economically with many Americans feeling isolated between extremes.

There is a renewed emphasis on evangelism, discipleship, and church planting. Whether congregational settings are large or small, people are looking for church communities committed

to authenticity, open-hearted fellowship, and a sense of belonging. The message of scriptural holiness is more relevant than ever, and it embraces and challenges all ages.

Children can play a big part in spreading the Good News of Jesus and in the support of missions. It is never too early or too late to begin doing your part to pray for the lost, contribute to missions giving through the World Evangelism Fund or Alabaster, or become more active in changing your world in Jesus' name.
